TABLE I, PART II.
FAUNA OF THE PHOSPHORIA FORMATION
(as compiled from published identifications)

PLEASE REPLACE IN POUCH
IN BACK OF BOUND VOLUME

Table with columns for geological formations (Montana, Southeastern Idaho, Western Wyoming and Northern Utah, West-central Wyoming, Southeastern Wyoming) and rows for various fossil groups (Pelecypods, Scaphopods, Gastropods, Cephalopods, Ostracods, Fish). Includes a 'References' section at the bottom.

NOTES: Although an effort has been made to make this list complete, some species may have been overlooked and, on the other hand, some species may be synonyms. The most recent generic names may not be used for some species, as no attempt was made to go fully into the literature of descriptive paleontology.
